九州大学
KYUSHU UNIVERSITY

Kyushu University Collaborative Platform in Research and Education on Humanities and Social Sciences

This symposium focuses on the changes in work patterns and environment brought about by the introduction of AI and algorithms in the workplace, particularly changes in control. Through a comparative analysis of the UK and Japan, we examine how these changes affect workers' rights and trade union functions, and explore the future direction of labour and employment law from the perspectives of legal philosophy, information engineering, and labour and employment law.

Control in a World of Algorithmic Management
&
the Future of Labour and Employment Law
